

1966 Triumph TR4A - IRS Factory Overdrive

Two main reasons I restored this car, first, this is a 1966 Triumph TR4A IRS car with a Factory Overdrive...*very rare indeed.* Second, when I found the car it had been stripped of paint and the body was rust free. I then had it painted in a Jaguar blue inside and out. The list of new parts and pieces that was used in the restoration is extensive. The outcome is a vey very nice car. There has been approximately 1800 miles put on the car since the work was completed. This Triumph is always garaged and only sees sunny days. The top comes down in the spring and goes back up in the fall. The car is blocked for the winter with approx 80 -85% of the weight off the suspension. If you are serious about buying this car, I would be happy to discuss this and send addition photo's etc. The car is located in Gimli, Manitoba. I can be reached at "tpatrick@mts.net" or "250-642-7616"

Regards Ty Patrick
