

Kamloops BC – August 2018

1972 MG Midget
\$12,500

Thinking of moving on from my 1972 MG Midget! This car has a rust-free, original body. It is a BC car, sold new in Victoria. The engine was rebuilt by a well-known A-series engine guru and now has around 2000 miles on it. It runs 1 ½" SU carbs. The Minilite style wheels were new and in the original boxes when I bought the car. There is a hardtop, spare engine, gearbox and differential with the car, also 5 restored original Rostyle wheels. I have installed poly bushes in the rear suspension. A Moss Motors rear crank seal kit has been fitted and the oil pump replaced with a new part at the same time. I have just replaced the clutch master and slave cylinders(the car sat for about 7 years before going on the road). The top, boot and tonneau are in excellent condition and I installed a complete new carpet kit and window seals. Asking \$12,500. The car is located in Kamloops
