

October 2018 – Nanaimo BC

**1979 Austin Mini
\$4,500**

It is a complete project car that I drive daily but isn't without its quirks. Pretty much everything on the front end has been replaced including the front brakes which I converted to 7.5 Cooper S disc brakes, new inner pot joints, driveshaft's, outer CV joint, and steel braided brake lines. Too much to list, better to be seen in person. I also have a spare 998 block and head and gearbox that I can throw in with it. The main issues with the car are that it burns oil and one of the tires has a nail in the sidewall. Also has a bit of rust on the rocker panel and rear valance. The sunroof leaks a bit too. It is also currently Alberta registered. I'm asking \$4,500, If you're seriously interested then give me a text or call at (780)717-1998 or drop me an email at: minicooper25@hotmail.com
