

November 2018 – Abbotsford BC

1988 Daimler Double Six \$6000

LH Steering, Likely the only one in Canada. Originally shipped to Japan and exported into Canada around 2000. These were never available for the North American market, a few are now in the US. A cut above the Vanden Plas this example shows very well with 79,000 KMS. Super rare in LH steering. Been in my family for the last 13 years. None of the usual rust. Recent maintenance items include new steering rack and hoses, Pirelli tires, brake pads, thermostats and water pump, injector hoses and other typical items. The car was used this summer and, like any Jag, needs a few minor items noted like RH rear window inoperative and heater valve etc.

Not looking for big dollars but feel car is worth an honest and realistic \$ 6000 cash or will swap for other English sporty vehicle.
